PROFILE

Web Developer with 1 year of experience in building responsive and dynamic websites. Skilled in React, WordPress, PHP, HTML, CSS, and JavaScript. Experienced in building React applications, creating reusable components, and integrating APIs for dynamic functionality. Proficient in creating custom WordPress themes, optimizing user experiences, and enhancing website performance. Adept at problem-solving, project management, and collaborating across teams to deliver scalable, user-centric web solutions. Passionate about continuous learning and innovation in web technologies.

PROFESSIONAL EXPERIENCE

Front End Developer, *Tron Digital, UAE (Remote)*   09/2024 – Present
                                                                                                             UAE (Remote)

Worked on the development of multiple projects, including a crypto mining machines company website, an academy website using React, and an e-commerce website using WordPress. Led the development of a custom WooCommerce-based website, enhancing performance and user experience. Currently engaged in building a crypto mining machine company website using React and Shopify.

Web Development Trainer, *Tron Academy, Thrissur*   09/2024 – Present

As a web development trainer, I teach students comprehensive WordPress development, including theme customization, plugin integration, and e-commerce setup, along with coding fundamentals for creating dynamic and responsive websites.

Junior Front End Developer, *New Dawn IT Solutions, Kollam*   02/2024 – 08/2024

Worked on the development of an Intranet portal serving as a comprehensive knowledge base for the organization's employees. This centralized platform provided access to organizational news, announcements, policy documents and a variety of electronic services, ensuring seamless information sharing and efficient workflow within the company
